

# MEZZANINE

## Visual Collaboration for the Enterprise

The Mezzanine™ workspace is an immersive digital canvas spanning screens, walls, and even locations. With the simultaneous display of images, videoconferencing, and screen sharing from multiple devices, you can easily work with everything you need. Presentations are more immersive, meetings are more productive, and collaboration is better than ever.

# THE MEZZANINE ADVANTAGE

Mezzanine brings into view all the data and resources you need for your next customer pitch, team meeting, or critical decision. It integrates all your tools—including applications, devices, and videoconferencing—into a unified experience.

## See What Everyone is Talking About

### Brilliantly detailed content and rich visual engagement

Traditional single-speaker, single-device, single-screen presentations don't provide what audiences want today: dynamic experiences focused on their unique needs.

Mezzanine surrounds the entire room with multiple streams of content. Fully immersive and fluidly controlled with the wand, Mezzanine is an impressive canvas that keeps teams engaged and visually informed. Build trust, increase engagement, maximize impact, and win the room—every time.

## Take Action, Not Turns

### Control and contribute instantly from any device

To make the best decisions for your business, your teams—whether local or remote—must be able to access and share all relevant data simultaneously.

Mezzanine embraces BYOD and multi-participant control. Use your web browser or iOS/Android devices to contribute information and fully interact with the workspace—wherever you're located.

## Unite Your Locations

An Infopresence session connects Chicago (above) and Los Angeles (left). Both locations share the same visual workspace.

### A truly democratic approach to collaboration

For teams in different locations to be on the same page, they must all be looking at the same page. Only Mezzanine delivers Infopresence™: the ability to connect your teams in a common workspace. Regardless of which Mezzanine room your teams are in, they can add, view, and interact with content as if they were all side by side. Share the same workspace across multiple Mezzanine rooms—and get work done.

## ABOUT OBLONG INDUSTRIES, INC.

John Underkoffler, CEO  
Cooper Hewitt National Design Award Winner  
for Interaction Design, 2015

Founded in 2006, Oblong Industries has created the platform for a new era of spatial, distributed, and collaborative computing. Our technology was the basis for the computing systems depicted in the film *Minority Report* and has roots in more than two decades of research at the MIT Media Lab.

Mezzanine is Oblong's visual collaboration solution, and it's the only product of its kind to link locations, teams, and content in a shared immersive workspace. Customers include IBM, NTT, Dentsu Aegis Network, and Beats Music. Oblong is privately held and located in Los Angeles, California.

# MEZZANINE FEATURES

## IMMERSIVE EXPERIENCE

---

### Multi-Surface Interaction

Present and share content and video streams across multiple displays and walls.

### Flexible Screen Configurations

Customize your workspace with a variety of screen configurations.

### Interactive Canvas

Position and size multiple windows of content to customize your view.

### Automated Layouts

Easily arrange on screen content in automated layout grids.

## WORK ACROSS DISTANCE

---

### Infopresence

Unite multiple Mezzanine rooms so everyone collaborates in and sees the same workspace, regardless of location.

## SEAMLESS CONTENT SHARING

---

### Concurrent Video Inputs

Share up to 10 video streams simultaneously including video conferencing and screen-sharing.

### Screencast

Share your screen wirelessly with the Mezzanine Screencast application.

### Plug and Play

Plug in your device for immediate content sharing.

### Whiteboard Camera

Share ideas captured on your physical whiteboard in your digital workspace.

### Content Upload

Add graphics and .pdfs directly to the workspace before and during the meeting to view presentations and documents.

## WORKSPACE MANAGEMENT

---

### Content Management

Save and discard workspaces to streamline meeting transitions and pick up where you left off.

### Grab and Go

Download your workspace to review and share after your meeting.

### Privacy

Password protect your workspace.

## FLEXIBLE CONTROL

---

### BYOD Interaction

Simultaneously control and contribute to the workspace from multiple locations and devices, including your laptop browser and iOS/Android devices.

### Wand

Gesturally control and organize the workspace with the wand. Just point and click, drag and drop from the comfort of your chair.

## DIGITAL INTERACTION

---

### Reachthrough

Remotely control connected laptops using the wand.

### Annotation

Mark up workspace content from your iOS/Android device.

### Snapshot

Instantly capture and store workspace content for quick and easy reference during the meeting or at a later time.
