Securonix Named top “20 Fastest Growing Security Company” by Silicon Review

The user behavior analytics company enjoys rapid adoption of its security platform

Securonix is among the “fastest growing cyber security companies,” The Silicon Review reported this week. The business and technology publication combed the market to identify the top 20 cyber security companies that are making a splash in 2015.

The standard enterprise security toolbox constantly leaves those tasked with protecting enterprise data a few steps behind attackers. As the scope and scale of attacks becomes increasingly alarming, the appetite for new and innovative enterprise security tools is heating up to a boiling point. The market is responding with an explosion of start-ups hungry to fill the industry’s need for capabilities that prevent, detect and contain attacks.

MONTHLY PERSPECTIVE

Insider Attacks Were the Most Costly

Breaches of 2015

By Stewart Draper, Director of Insider Threat Programs

Insiders pose tremendous risk to organizations, according to the most recent Ponemon Report. Malicious insiders were not the most common source of attacks last year, but they were the most costly. According to 2015 data, insider attacks cost companies about \$144,000 per incident. Containing and resolving the complexities associated with inside actors cost companies an average of \$21,000 per day, and added up fast.
