

Carahsoft Technology Corp. is the trusted Government IT solutions provider, combining technological expertise with a thorough understanding of the government procurement process to help federal, state, and local government agencies select and implement the best solution at the best possible value. As a top-ranked GSA Schedule Contract holder, Carahsoft is the largest government partner and master government aggregator for many of its best-of-breed vendors, managing their public sector reseller networks and driving demand for their offerings.

Carahsoft is consistently recognized by its partners as a top revenue producer and is listed among the industry's fastest growing firms by VARBusiness, CRN, Inc., Washington Technology, and the Washington Business Journal. For a complete list of Carahsoft's awards and recognition, visit our awards page.

VMware is the global leader in cloud and virtualization solutions from the desktop to the datacenter. All 15 cabinet level agencies, all military services, numerous DoD agencies, joint and unified commands, and many independent Federal agencies rely on VMware to avoid IT infrastructure costs, ensure continuity of operations, and provide secure endpoint computing capabilities.

Symantec enables government agencies to have confidence in their IT infrastructure. Helping agencies protect and manage mission-critical information and interactions, Symantec delivers software and services that address risks to security, availability, compliance and performance. The Symantec umbrella includes all Symantec products and services, including Altiris, MessageLabs, and Vontu.

EMC, the world leader in information infrastructure technologies, provides solutions to help agencies create a cost-effective, secure information and virtual infrastructure. EMC's products and solutions such as networked storage, data backup and recovery, backup management; data archiving, protection, deduplication, consolidation, replication; content management, and information security enable customers in their journey to private cloud computing.

F5 Networks helps government organizations create an agile IT infrastructure that aligns with mission critical demands. With F5 solutions in place, organizations gain strategic points of control wherever information is exchanged, from client devices and the network to application servers, data storage, and everything in between.

Red Hat is more than a software company. Red Hat makes the rapid innovation of open source technology consumable in mission-critical, enterprise environments. Red Hat combines a superior development model with a customer-friendly business model that gives customers the choice, flexibility, and power to build an IT infrastructure that solves their business problems and makes their IT a strategic advantage. By offering subscriptions for enterprise technology and services, we stand up for open source ideals, and we foster greater participation in the open source process. Red Hat is a catalyst for a technology movement that has already changed the world.

Adobe intelligent forms, rich media applications, and web conferencing software integrates easily with existing enterprise applications, enabling government agencies to share information with and among constituencies quickly, efficiently, and securely – anytime, anywhere, and through any medium.

SAP Government Solutions provides the SOA-based business platform government agencies need to simplify and unify business processes across the enterprise, deliver new and innovative constituent services, comply with changing mandates, and improve mission delivery and agency performance.

HP's Business Technology software enables government agencies to transform and modernize IT operations by automating key IT functions and processes, helping to ensure that IT strategy, applications, and operations are aligned with agency goals. The HP Software umbrella includes all HP Software products and services, including Arcsight, Fortify, Mercury, Openview, Opsware, Perigrin, SpiDynamics, Tipping Point and Tower Software.
