FOR IMMEDIATE RELEASE

TerraGo® Technologies Names Carahsoft as Master GSA Schedule Holder

Carahsoft to Serve as Federal Government Distributor & Master GSA Partner

Reston, VA – October 1, 2007 – Carahsoft Technology Corp., a government-focused information technology provider, announced today that it will serve as master GSA schedule holder for TerraGo Technologies, making Map2PDF® products readily available to the Federal, state and local government markets.

TerraGo Technologies pioneered GeoPDF®, the only geospatial data distribution format that connects anyone with Adobe® Reader® to interactive mapping data. Geospatial professionals are able to give connected and disconnected workers controlled access to information in a format they already understand utilizing an application they already have. The GeoPDF format empowers organizations to fully leverage their significant investments in geospatial intelligence.

“Carahsoft has been successful helping In-Q-Tel portfolio companies like ours bring solutions to the government market,” says James Davis, TerraGo Technologies President and CEO. “In addition to their established Adobe business practice, Carahsoft understands our product line, has committed dedicated resources to provide proactive sales and marketing support and offers an unparalleled level of government contracting expertise.”

With the addition of TerraGo Technologies, Carahsoft's Intelligence Solutions team now includes more than a dozen of the In-Q-Tel portfolio companies, with more being added each quarter. Founded by the CIA, In-Q-Tel is a private organization that plays an important role in national security by supporting the development of cutting-edge technologies. The team, which is Carahsoft's fastest-growing and most unique business practice, has facilitated millions of dollars in government business for this group of emerging technology vendors.

“As one of the largest creators and consumers of geospatial data in the world, the U.S. Government is already beginning to leverage the power of Map2PDF,” says Craig P. Abod, Carahsoft President, citing the recent adoption of the GeoPDF format by the U.S. Geological Survey. “We look forward to working with TerraGo Technologies to assist other agencies that rely on mapping data to do their jobs effectively. From war fighters to city planners, everyone can quickly and easily utilize mapping data shared in GeoPDF files and that makes operations simpler and more cost-effective.”

About Carahsoft

Carahsoft Technology Corp. is the trusted Government IT solutions provider. The company combines technological expertise with a thorough understanding of the government procurement process to help federal, state and local government agencies select and implement the best solution at the best possible value.

Carahsoft serves as the master GSA schedule holder/distributor for TerraGo Technologies, Adobe, VMware, Symantec, Red Hat, MySQL, Opsware, Pillar Data Systems, Brocade and Avue Technologies.

In addition to its Adobe, VMware, Open Source and Symantec solutions teams, Carahsoft maintains dedicated teams to support sales, marketing and delivery of HR solutions, on-demand solutions including Salesforce.com, as well as intelligence solutions through its partnerships with many of the In-Q-Tel portfolio companies.
