INTELLIGENCE SOLUTIONS

CARASOFT EMERGING TECHNOLOGY SOLUTIONS

As a government IT solutions provider, Carahsoft is committed to ensuring that government agencies have access to the latest and most promising information technologies and niche products. We devote substantial resources to monitoring and evaluating numerous emerging and strategic technologies. All products are available on the Carahsoft Technology Corp. GSA Schedule.

Unmatched Identity & Access Management

Aladdin eToken offers a suite of unmatched identity and access management tools. eToken uses enhanced PKI encryption and digital signing for VPN, data protection, password management, and secure network access.

Data Security for Mobile Devices

Trust Digital secures Microsoft Windows Mobile solutions per the DISA-STIG (FIPS 140-2 requirements). Agencies now have an advanced email security solution offering reliability and improved security with no third-party NOC.

Secure Remote Support for Government

Bomgar's market leading enterprise remote support enables support technicians to securely access and control any device, anywhere. Bomgar remote solution is specifically designed to address the government's security and data protection standards.

Best In Class Data Encryption

Utimaco provides comprehensive data encryption security solutions. Protect your confidential information and comply with regulatory mandates – safely and securely – with SafeGuard Enterprise, Utimaco's comprehensive modular information protection platform.

Application Data Security and Compliance

Imperva is the leader in application data security, delivering data governance and protection solutions that monitor, audit, and secure business applications and databases. Imperva's practical solutions provide full visibility into all data access, enabling operationally efficient granular control and maintenance of critical data.

Business Process Management Software

Top-performing companies worldwide choose Savvion to operate more productively and profitably. Savvion moves enterprises beyond ordinary business process management with groundbreaking software, solutions and services.

Encryption & Authentication Software

ISC has focused on the design and development of standards-compliant public key encryption and authentication software since 1989. Our products have been adopted and widely deployed by the most security-conscious federal intelligence and law enforcement agencies, as well as by many large corporations world-wide.

3D Performance Support Solutions

NGRAIN software improves training and maintenance support systems with interactive 3D equipment simulations. Customers have experienced multi-million dollar savings in cost avoidance, trained 60% faster, and reduced turn-time by 30%.

Unified IP Management & Security

Narus, Inc. provides unified IP Management and Security for the largest carrier and government networks in the world. The Narus IP Platform offers a "Total Network View" through the real-time collection and analysis of one to billions of packets across multiple networks at up to OC-192 rates to enable IP applications such as security, traffic and customer analysis, monitoring, and billing.

Enterprise Single Sign-on Platform

Passlogix® is the developer of the v-GO Sign-On Platform, the market's most robust, scalable and easy-to-deploy enterprise single sign-on. Patented intelligence-based technology eliminates lengthy and expensive implementation cycles, and provides rapid return on investment, by adapting to any existing infrastructure without the need for custom coding or replacement of legacy hardware or software.

The Nexus of Security and Networking

Commanding a unique position at the nexus of security and networking, Q1 Labs is redefining network security management. QRadar combines flow-based network knowledge, security event correlation, and asset-based vulnerability assessment.
