

Information Security Corporation and Carahsoft Technology Corp. Join Forces to Win Data at Rest Blanket Purchase Agreement

Information Security Corporation in partnership with Carahsoft Technology Corp. is Awarded Enterprise Software Agreement under Department of Defense Enterprise Software Initiative and GSA SmartBUY program.

Chicago, IL and Reston, VA (June 22, 2007) – Information Security Corporation (ISC), an encryption technology innovator and data protection provider, is pleased to announce it has been awarded a blanket purchase agreement (BPA) by the Office of Management and Budget, Department of Defense and General Services Agency for their encryption applications. Under the new BPA, Carahsoft Technology Corp. can offer ISC's products to **Federal, State and Local agencies** providing them with the strongest standard encryption products under DOD's Enterprise Software Initiative and GSA's SmartBUY program.

Products offered under the BPA include *SecretAgent*, *SecretAgent DAS* and *SpyProof!*. *SecretAgent*, the leading X.509 certificate-based encryption and digital signature utility, protects data-at-rest and data-in-transit with or without a formal PKI on a wide range of platforms. Further extending *SecretAgent's* enterprise features, *SecretAgent DAS* facilitates the sharing of sensitive documents within dynamic communities of interest. *SpyProof!* allows users to create and manage sharable virtual disks that provide transparent data encryption. These along with a robust suite of other encryption application and administrative tools will enable a customer to address all of their data security needs.

"We are excited to be working with ISC to deliver their industry leading data encryption software to Federal, State and Local agencies through this widespread BPA," said Craig P. Abod, President of Carahsoft. "DOD agencies will benefit from the ease of using GSA's SmartBUY program combined with Carahsoft's outstanding representatives and support. Also, GSA's SmartBUY program will provide all acquisition support for civilian agencies, including state and local governments."

Federal, state and local government agencies can now purchase these products at a significant discount to protect sensitive data residing on government infrastructure including servers, mainframes, laptops, mobile computing devices and removable storage media devices. More information on this award can be found on the Enterprise Software Initiative website at www.esi.mil.

About Information Security Corporation

Founded in 1989, Information Security Corporation (ISC) is the leader in the development of easy to use encryption and authentication solutions designed around well-established cryptographic standards. ISC provides COTS products, cryptographic development tools, custom development services and information assurance consulting to the most security-conscious government agencies and corporations world-wide.
