**CENTRIFUGE SYSTEMS AND CARAHSOFT TEAM TO PROVIDE GOVERNMENT WITH
INDUSTRY LEADING INFORMATION VISUALIZATION SOFTWARE**

Centrifuge Ground-Breaking Thin Client Product Added to Carahsoft GSA Schedule

Reston, VA - April 23, 2008 - Centrifuge Systems, a leading provider of information visualization software, today announced a partnership with Carahsoft Technology Corp, a trusted government IT solutions provider. Under the agreement, Carahsoft will add Centrifuge's products to its GSA schedule and provide proactive sales and marketing support to drive demand for the products within the public sector marketplace.

"We are pleased to carry Centrifuge's dynamic, visual analytics technology software on our GSA schedule," said Craig P. Abod, Carahsoft president. "The company's products and its deep expertise within the Intelligence Community complement our growing portfolio of solutions that address the government's accelerated demand for sophisticated and intuitive data analysis and discovery tools."

With the addition of Centrifuge Systems, Carahsoft's Intelligence Solutions team now encompasses more than 20 vendors, providing Department of Defense, Intelligence Community, and civilian agencies with a single point of access to the latest technologies.

"Centrifuge sets a new standard for information visualization analysis that holds great promise for agencies whose missions rely on synthesizing and extracting meaning from massive amounts of data," said Neil Herron, Vice President of Sales for Centrifuge. "By leveraging Carahsoft's proven expertise in public sector marketing, sales, and federal acquisition strategy, we will be able to make our solutions readily available to these organizations."

Carahsoft's GSA listing for Centrifuge products (GS-35F-0131R) was effective April 3, 2008. For more information, contact Carahsoft at 888-662-2724 or intelteam@carahsoft.com. About Centrifuge:

Centrifuge Systems is a leading provider of next generation business intelligence software that helps organizations discover insights, patterns and relationships hidden in their data. Traditional business intelligence solutions require users to define what they want to see in advance and present the results in static dashboards. With Centrifuge, users determine what is of interest "on the fly", then manipulate the displays directly in a highly interactive fashion. The experience is refreshingly easy-to-use and the resulting insights can be extraordinary.

Centrifuge is used in some of the most demanding applications in the world, including counter-terrorism and homeland defense, to help analysts move from data to discovery.
