

## **IQM2, Inc. Releases iPad Accessibility for Meeting Management Solution**

Ronkonkoma, NY - February 14, 2011- IQM2, Inc. announced today that they have released the accessibility of using their software with the iPad, something that many consumers will find useful and intriguing.

By utilizing HTML5, the latest in browser technology, IQM2's Citizen Portal will automatically detect iPads & iPhones as well as automatically rendering video in HTML5 using the MP4 videos. Citizens will now have all the functionality and robust user experiences on these new mobile platforms as if they were on their desktop PC. It is so flexible that jumping to individual agenda items and segments of the meeting are possible.

"Our goal has always been to use innovative technology to help governments engage their citizens easily and effectively. With consumer adoption of the Apple mobile devices, we wanted to empower citizens and public sector officials with the convenience of using these devices to stay engaged in discussions critical to their communities" said Daryl Blowes, IQM2, Inc. CEO.
