

# Anonymizer® Intelligence Chameleon™

## The most trusted solution for secure intelligence harvesting

- Shield the identity of the web harvester
- Distribute automated spider into thousands of IPs
- Snapshot a web site without leaving any footprints

### Risks to Gathering Open Source Intelligence on the Internet

Information assurance is crucial for organizations engaged in any type of intelligence gathering on the Internet.

*Before you place too much importance on the information you extract from Web sites, you should take a closer look.*

By using simple tools, site administrators are able to determine who is visiting their site by the visitor's IP address. When the Web server receives a page request, a script checks the IP address of the user against a list of known IP addresses that the site wishes to block or cloak against. If a match is found, the server delivers an error message such as "Access Denied" or "Page Not Found." Or it may redirect visitors to a "cloaked" Web site displaying false information.

Most organizations protect against in-bound threats such as viruses, hackers, and spam. Anonymizer provides proven solutions to combat out-bound threats such as blocking and cloaking that can compromise covert identity and the accuracy of information retrieved.

### For Organizations Engaged in Intelligence Harvesting:

The *Anonymizer Intelligence Chameleon* ensures valuable information assurance and identity protection for your agency when engaged in any of the following activities:

- Web harvesting
- Unstructured Data Management (UDM)
- Internet "chatter" analysis
- Government and/or corporate research

*Intelligence Chameleon* spreads your traffic over thousands of unique IP addresses so one can appear to be thousands of visitors while harvesting large amounts of data from a single site. This allows analysts to circumvent devious tactics such as Web site blocking, "spoofing," and traffic analysis, and thus access accurate data.

### Proven Identity-Protection Solutions

Anonymizer non-attribution solutions mitigate these threats by providing government users true anonymity on the Internet, thereby completely shielding your network identity.

### The Anonymizer Advantage

*Anonymizer, Inc. is the global leader in online privacy and identity protection solutions. The company's core competency is non-attribution and its world-class consumer, enterprise, and government solutions are second to none. Because of Anonymizer's hardened networks, redundant connections, and strict internal procedures, the company has been able to weather everything from hacker attacks to government-sponsored intrusion teams. Providing non-attributions since 1995, Anonymizer has never experienced a security breach and it has ensured a safe and secure Internet for millions of users and billions of Web pages.*

**Anonymizer®**

*Trusted / Proven / Secure*

# Anonymizer® Intelligence Chameleon™ Features & Benefits

*Anonymizer Intelligence Chameleon* ensures data integrity by providing your servers with thousands of IP addresses, so that the user’s machine and the organization’s domain remain unrecognized by the target Web site. When a Web administrator attempts to identify your domain name or IP address, your users blend discreetly into the general visitor population, in a “Chameleon-like” fashion.

▪ **Complete Non-Attribution**

*Intelligence Chameleon* prevents others from tracing a user’s identity, and keeps your agency’s identity protected. This enables your users to access target sites without being blocked or spoofed, thus ensuring data integrity.

▪ **Fast Internet Connections**

Using dedicated servers, *Intelligence Chameleon* ensures a fast, flawless Internet connection with very high availability for a positive and seamless user experience.

▪ **IP Control**

Domains and IP addresses are utilized only by vetted and licensed subscribers. These enterprise-class solutions are not available to the general public.

▪ **IP Exploder**

*Intelligence Chameleon* spreads your automated spider searches over thousands of non-attributable IP addresses so that you can scrape a web site anonymously and undetected.

▪ **Hardened Security**

Users access the Internet through a series of private servers and proxies that never write any data to disk. Because information is never recorded to any network server, Anonymizer can guarantee its customers complete user privacy and security, even in the unlikely event of a breach situation.

▪ **Secure Connection**

*Intelligence Chameleon* protects the customer’s connection to Anonymizer with triple-DES or AES encryption, which ensures the integrity and privacy of confidential, secure, or secret information.

▪ **Scalable Solution**

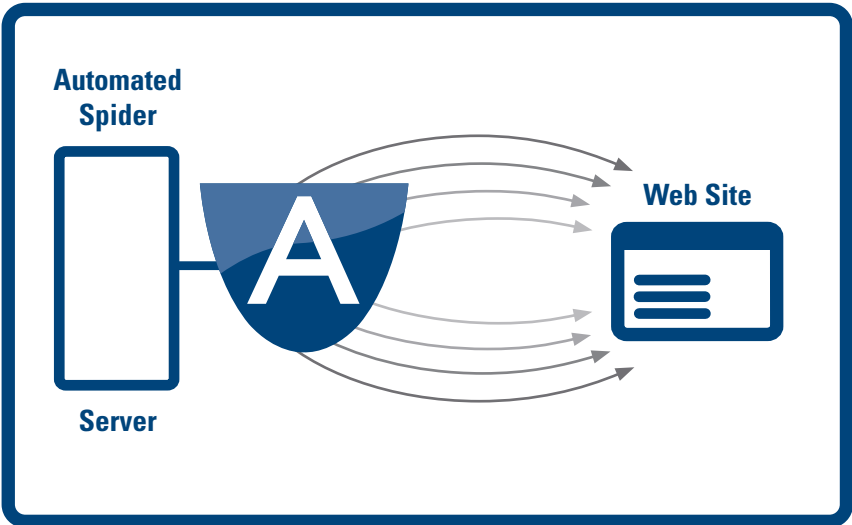

Whether you have one or more servers, *Intelligence Chameleon* easily accommodates your current and future requirements.

▪ **Ease of Deployment**

The *Anonymizer Intelligence Chameleon* technology is server-side and platform-independent. There is no client software to download or install.

▪ **Traffic Mixing (optional)**

*Intelligence Chameleon* blends your Internet traffic with traffic from millions of users from outside your organization, preventing other Web sites from profiling your users based on their IP addresses.
