

MinuteTraq & MediaTraq

Software for Agendas, Minutes, Vote Recording, and Video Streaming

IQM2 is a Turn Key Vendor offering a solution that covers the entire meeting process from document creation through video presentation.

Utilized for Every Meeting, our IQM2 Meeting Management suite can be used to organize, automate and coordinate your Committee, Council & Board meetings.

Automates the Meeting Process from agenda item creation through meeting minutes and video publishing on your website.

Central Repository is used to store, track and search all of your related documents to each of the agenda items and resolutions.

Transparent Tracking and Routing of approvals and also follow ups of approved agenda action items.

Electronic Boardroom captures, tabulates and displays Council Member votes for each agenda item in real time.

Synchronized Audio/Video Recordings of Council Meetings are coordinated with Agenda items and supporting documents on your website, offering robust search capabilities for citizen access (**i.e. FOIL and Open Records requests**)

Citizen Access / Website Search of archived history of agenda items (whether approved, rejected or tabled) are linked with current agenda and minutes items for easy search and retrieval for staff and citizens.

One company, one solution.

IQM2 provides the only total meeting management solution, under one roof without partnering.
