

Carahsoft Technology Corp. is the trusted Government IT solutions provider, combining technological expertise with a thorough understanding of the government procurement process to help federal, state, and local government agencies select and implement the best solution at the best possible value. As a top-ranked GSA Schedule and SEWP Contract holder, Carahsoft is the largest government partner, distributor, and master government aggregator for many of its best-of-breed vendors, managing their public sector reseller networks and driving demand for their offerings.

888-6VMWARE

VMware is the global leader in virtualization and cloud computing solutions from desktop to datacenter. All 15 cabinet level agencies, military services, numerous DoD agencies, joint and unified commands, and many independent federal agencies rely on VMware to avoid IT infrastructure costs, ensure continuity of operations, and provide secure endpoint computing capabilities.

877-GOV-SYMC

Symantec enables government agencies to have confidence in their IT infrastructure. Helping agencies protect and manage mission-critical information and interactions, Symantec delivers software and services that address risks to security, availability, compliance, and performance. The Symantec umbrella includes all Symantec products and services including MessageLabs and Vontu.

866-837-4827

Veritas Technologies enables organizations to harness the power of their information, with solutions that serve the world's largest and most complex environments. Veritas offers an integrated portfolio that provides real-time insights into an organization's information footprint and empowers leaders to make decisions about what to protect and what to delete.

(877) 9-NO-MALW

FireEye provides real-time threat protection without the use of signatures to protect an organization across the primary threat vectors and across the different stages of an attack life cycle. The core of the FireEye platform is a virtual execution engine, complemented by dynamic threat intelligence, to identify and block cyber attacks in real time.

888-9-EMC-2-GO

EMC Corporation is a global leader in enabling government agencies and service providers to transform their operations and deliver IT as a service. Fundamental to this transformation is cloud computing. Through innovative products and services, EMC accelerates the journey to cloud computing, helping IT departments store, manage, protect, and analyze their most valuable asset—information—in a more agile, trusted, and cost-efficient way.

877-95-F5GOV

F5 Networks helps government organizations create an agile IT infrastructure that aligns with mission critical demands. With F5 solutions in place, organizations gain strategic points of control wherever information is exchanged, from client devices and the network to application servers, data storage, and everything in between.

877-RHAT-GOV

Red Hat understands that government agencies demand performance, transparency, and value—and that's exactly what Red Hat offers. As the standard for Linux in governments worldwide, Red Hat's cloud, virtualization, storage and platform solutions bring freedom, collaboration, and the power of open source to federal, state, and local agencies.

877-99ADOBE

Adobe revolutionizes how agencies engage with ideas and information, transforming and extending government services to provide a richer, more productive, and trusted experience with constituents, agency personnel, and the military. Adobe has the largest software footprint in the world, which uniquely positions them to help government deliver information to the edge – anytime, anywhere, and through any medium.

844-55-GOGL

Google for Work allows employees to work the way they live, enabling government agencies and businesses to move fast and innovate. By enhancing its consumer products with the features and controls your organization needs to be productive, secure, and efficient, Google is enabling employees to work better together, from anywhere and with tools they can trust.

888-SAP-1GOV

SAP sets a new standard for innovation and performance in the public sector with integrated solutions that apply database technology, business analytics, applications, cloud computing, and mobility to solve their toughest challenges.
