SAP NS2 Cloud Solutions
SAP Applications Deployed with Premium Security

SAP is the market leader in enterprise application software, helping companies of all sizes and industries run at their best. In 2004, SAP founded SAP National Security Services (SAP NS2), an independent subsidary, to help protect and secure the critical data of our nation. We deliver world class innovation to all industries, including those that require the utmost security and protection. Our team is made up of 100% United States persons on United States soil managing enterprise scale cloud infrastructure across many different cloud applications. SAP NS2 provides the unique capability for customers in the U.S. Federal, defense, and aerospace industries to run market leading SAP applications without having to sacrifice innovation or cost.

SAP NS2 delivers success by providing the following:

Secure Infrastructure

Secure Delivery

Security & Compliance

Secure Infrastructure

Security is deeply rooted in our SAP cloud solutions. We operate our cloud services and support from DoD compliant facilities with applications hosted on the most secure hyperscaler infrastructure. Our team secures and automates the deployment of SAP solutions in these regions which include FedRAMP High with DoD Impact Level 4/5 security controls.

We know SAP, because we are SAP

Secure Delivery

Our secure delivery team incorporates best practices for implementing a Continuous Integration and Continuous Delivery (CI/CD) model. Our team delivers 24x7 support to provide consistent and automated cloud deployments for SAP applications. We offer automated delivery of the applications, minimizing human intervention and reducing risk for our customers. SAP NS2 provides monitoring strategies that utilize an automated means of detecting threats and examining the performance of our cloud solutions. We have dedicated teams for cloud support, provisioning, operations and security.

SAP NS2 is Committed to Security and our Customers

Security & Compliance

Our team of specialized resources have a deep knowledge of SAP software as well as the specific security and compliance requirements demanded by U.S. Federal, defense, aerospace, and critical infrastructure organizations. SAP NS2 solutions are delivered with compliance meeting the most stringent security controls, managed by cleared resources located on United States soil.
