

Emergent at-a-Glance

As an IT solutions provider with deep roots as a reseller, Emergent is built to be there at every step. Whether you're starting a solution from scratch, upgrading your technology or enhancing your staff's capabilities, we offer dedicated support for any stage of your business challenge.

Emergent's 360° approach is rooted in three core principles:

Putting you first.

Connecting you to the best.

Focusing on what matters.

The Emergent 360° Approach

Business and Technology Analysis.
We listen closely and prioritize your requirements from the start, identifying the perfect partners and technologies for your specific challenge.

Solution Sustainment & Management.

We keep you connected to our provider partners, so you can maintain your systems with lower risk and cost.

Training & Enablement.

It's our mission to make your technology investment succeed. We stay on to deliver custom training to your end-users, ensuring successful deployment and adoption.

Implementation.

We help you select the components and capabilities that align your business and technology strategy with your needs — now and in the future.

Solution Architecture.

Our experts design solutions with context and purpose — recommending the precise mix of technologies and training that will serve your organization best.

Procurement Strategy and Acquisition.

We have the knowledge, contracts and partnerships to make procurement easy — giving you direct access to the tools you need, at incomparable value.
