

Keeper Wins Four G2 Best Software Awards

Enterprise Password Manager Scores Spot on Top 100 Software Products

CHICAGO, April 16, 2020 – **Keeper Security**, provider of the leading cybersecurity platform for preventing password-related data breaches and cyberthreats, today announced that the company has been ranked in four categories by G2 in their Best Software Awards 2020. G2's Best Software Awards rank the world's best software companies and products based on authentic, timely reviews from real users.

This year, Keeper made G2's list in the following categories:

- Top 100 Software Products
- Top 50 Remote Tools
- Top 50 SMB Products
- Top 100 Highest Satisfaction Products

"These awards are especially gratifying because they are based on authentic user reviews and the actual experiences of our customers," said Darren Guccione, CEO and Co-Founder of Keeper. "We're especially proud of our Top 20 ranking among remote tools, which is essential in the current climate where professionals and families need cybersecurity protection they can rely on at home."

Tech companies on the list have proven their commitment and value based on objectively verified reviews. Chosen from among 57,844 software companies on G2, Keeper is honored to be recognized in four categories, an achievement that can only be earned through the endorsement of users. **As of Spring 2020, Keeper's G2 rating is 4.7 out of 5 stars.**

"This isn't a subjective list based on a few peoples' opinions," explains G2 CEO, Godard Abel. "With the highest traffic and engagement, the largest selection of products and services, and highest quality data, G2 analyzes more than four million data points to determine which products and companies make the list."

G2 awards are based on data from more than one million verified customer reviews written and published between January 1, 2019 - March 3, 2020. These reviews – each vetted by a real person to ensure legitimacy – spanned 77,381 software products. All scores are calculated using G2's algorithms, including for Satisfaction and Market Presence, explained in detail [here](#).

About Keeper Security, Inc.

Keeper Security, Inc. (Keeper) is the market-leading, top-rated cybersecurity platform for preventing password-related data breaches and cyberthreats.
